1. The word "waste" in the above statement refers to the total volume of cooling and contaminated waters to be discharged.
2. Such treatment facilities as have been approved by this Commission shall be continuously and efficiently operated to produce an effluent having:
 - A. A pH range between 6.5 and 8.5.
3. Chemical sludges or sludges containing oils, or sludges having high or low pH values must be disposed of on land and not discharged to a State waterway.
4. Spoiled batches of chemicals or toxic chemical products must be ponded or lagooned.
5. Uncontaminated process waters and cooling waters are to be combined with contaminated effluents to achieve dilution.
6. All requirements and ordinances of the county regarding the installation, construction and maintenance of septic tanks are hereby made a condition of this permit.
7. Effluent from the septic tank is to be discharged to a suitable drainfield.

JPB/dn

(continued on reverse side)

This permit does not allow the discharge of wastes other than those mentioned herein. A new application shall be submitted whenever a change in the waste to be discharged is anticipated.

This permit is subject to termination if the Commission finds: (1) That it was procured by misrepresentation of any material fact or by lack of full disclosure in the application; (2) That there has been a violation of the conditions thereof; (3) That a material change in quantity or type of waste disposal exists.

In the event that a material change in the conditions of the state waters utilized creates a dangerous degree of pollution, the Commission may specify additional conditions to this permit.

Signed: _____

Alfred T. Neale

Director, Pollution Control Commission

This permit does not in any way release the permittee from liability for damage to persons or property caused by or resulting from the discharge of waste.
